Now updated to include new chapters dedicated to the Global Economic Crisis. The most exciting new text in a generation, Chad Jones's Macroeconomics will change the way intermediate macroeconomics courses are taught. It is the first and only undergraduate text to present the Romer model of Endogenous Technological Change, which is integral to the way economists study growth theory today. Other texts stop at the Solow model, an approach first formulated in the 1950s. Jones presents the Romer model at an appropriate level for undergraduates. The text is written in an engaging, conversational style that makes students feel as though they are sitting in on one of Professor Jones's lectures. When introducing new material, he presents it in a careful, patient manner and follows the discussion with case studies and worked examples. Each chapter includes two
