chemistry faculty encounter, this book is comparable to sitting down with a colleague in the department and talking through some ideas, or gaining some pointers on how to avoid common pitfalls. It is the one single place new chemistry faculty can go to find practical information on how to teach and how to prepare for teaching their first course. Chapters are written both by established experts in the field and by new professors within their first couple of years of teaching.

### **Survival Handbook for the New Chemistry Instructor**

Written by the author, the Study Guide is keyed to the learning goals in the text and designed to promote active learning through a variety of exercises with answers and mastery exams. Also contains complete solutions to odd-numbered problems.

Frost and Deal's General, Organic, and Biological Chemistry gives students a focused introduction to the fundamental and relevant connections between chemistry and life. Emphasizing the development of problem-solving skills with distinct Inquiry Questions and Activities, this text empowers students to solve problems in different and applied contexts relating to health and biochemistry. Integrated coverage of biochemical applications throughout keeps students interested in the material and allow for a more efficient progression through the topics. Concise, practical, and integrated, Frost's streamlined approach offers students a clear path through the content. Applications throughout the narrative, the visual program, and problem-solving support in each chapter improve their retention of the concepts and skills as they master them. General, organic, and biological chemistry topics are integrated throughout each chapter to create a seamless framework that immediately relates chemistry to students' future allied

th th The 20 International Conference on Chemical Education (20 ICCE), which had rd th “Chemistry in the ICT Age” as the theme, was held from 3 to 8 August 2008 at Le Méridien Hotel, Pointe aux Piments, in Mauritius. With more than 200 participants from 40 countries, the conference featured 140 oral and 50 poster presentations. th Participants of the 20 ICCE were invited to submit full papers and the latter were subjected to peer review. The selected accepted papers are collected in this book of proceedings. This book of proceedings encloses 39 presentations covering topics ranging from fundamental to applied chemistry, such as Arts and Chemistry Education, Biochemistry and Biotechnology, Chemical Education for Development, Chemistry at Secondary Level, Chemistry at Tertiary Level, Chemistry Teacher Education, Chemistry and Society, Chemistry Olympiad, Context Oriented Chemistry, ICT and Chemistry Education, Green Chemistry, Micro Scale Chemistry, Modern Technologies in Chemistry Education, Network for Chemistry and Chemical Engineering Education, Public Understanding of Chemistry, Research in Chemistry Education and Science Education at Elementary Level. We would like to thank those who submitted the full papers and the reviewers for their timely help in assessing the papers for publication. th We would also like to pay a special tribute to all the sponsors of the 20 ICCE and, in

### **Introductory Chemistry: An Atoms First Approach**

The authors, who have more than two decades of combined experience teaching an atoms-first course, have gone beyond reorganizing the topics. They emphasize the particulate nature of matter throughout the book in the text, art, and problems, while placing the chemistry in a biological, environmental, or geological context. The authors use a consistent problem-solving model and provide students with ample opportunities to practice.

### **Essentials of General, Organic, and Biochemistry**

Chemical reaction engineering is concerned with the exploitation of chemical reactions on a commercial scale. It's goal is the successful design and operation of chemical reactors. This text emphasizes qualitative arguments, simple design methods, graphical procedures, and frequent comparison of capabilities of the major reactor types. Simple ideas are treated first, and are then extended to the more complex.

policies of today's world leaders. The Sixth Edition has been thoroughly updated to reflect the current economic condition in the United States and the world and reflects recent events in the Obama administration, especially in regard to healthcare. The supportive pedagogical framework that guides students through each chapter includes Fundamental Questions, which open and organize the chapter by focusing on three to six key issues, and which then reappear both at point of relevance in the margins and in the end-of-chapter Summary sections; Now You Try It checkpoint questions that quiz students on important concepts, with answers provided at the back of the book; Recaps at the end of each major section to break material into manageable segments; and end-of-chapter exercises that serve as self-checks for students and as homework assignment options for instructors. A built-in study guide follows each chapter, and provides a more intensive review opportunity for students, with answers provided in an appendix. Most chapters contain four pages of study material consisting of key term match-ups, multiple-choice quizzes, and practice questions and problems. A final section of application problems gives students an opportunity to analyze and synthesize what they have learned. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. ### **Calculations in Chemistry**

In Sullivan's Crossing, #1 New York Times bestselling author Robyn Carr has created a place where good people, powerful emotions, great humor and a healthy dose of common sense are the key ingredients to a happy life. Sullivan's Crossing brings out the best in people. It's a place you'll want to visit again and again. Dr. Leigh Culver loves practicing medicine in Timberlake, Colorado. It is a much-needed change of pace from her stressful life in Chicago. The only drawback is she misses her aunt Helen, the woman who raised her. But it's time that Leigh has her independence, and she hopes the beauty of the Colorado wilderness will entice her aunt to visit often. Helen Culver is an independent woman who lovingly raised her sister's orphaned child. Now, with Leigh grown, it's time for her to live life for herself. The retired teacher has become a successful mystery writer who loves to travel and intends to never experience winter again. When Helen visits Leigh, she is surprised to find her niece still needs her, especially when it comes to sorting out her love life. But the biggest surprise comes when Leigh takes Helen out to Sullivan's Crossing and Helen finds herself falling for the place and one special person. Helen and Leigh will each have to decide if they can open themselves up to love neither expected to find and seize the opportunity to live their best lives.

### **The Best of Us**

Timberlake's Chemistry: An Introduction to General, Organic, and Biological Chemistry is designed to help prepare students for health-related careers, such as nursing, dietetics, respiratory therapy, and environmental or agricultural science. Assuming no prior knowledge of chemistry, it aims to make this course an engaging and positive experience by relating the structure and behavior of matter to its role in health and the environment. Timberlake maintains the clear, friendly writing style and the real-world, health-related applications that have made this text a leader in the discipline. The Eleventh Edition introduces more problem-solving strategies-including new Concept Checks, more Guides to Problem Solving, and more conceptual, challenge, and combined problems.

chemistry while providing the scaffolded support they need. The text uses accessible language and a moderate pace to provide an easy-to-follow approach for first-time chemistry students and those hoping to renew their study of chemistry. With *Basic Chemistry*, Bill and Karen Timberlake make the study of chemistry an engaging and positive experience for today's students by relating the structure and behavior of matter to real life. The 6th Edition presents a new visual program that incorporates sound pedagogical principles from educational research on the way today's students learn and retain knowledge. The text's applied focus helps students connect chemistry with their interests and potential careers through applications tied to real-life topics in health, the environment, and medicine. The new edition strengthens its emphasis on problem solving with additional end-of-chapter Challenge problems and new assignable practice problems that ensure students master the basic quantitative skills and conceptual understanding needed to succeed in this course and to continue their studies in the field.
